

Process Safety Management Risk Management Plans

With over 50 years of Experience

as industry consultants, compliance managers and regulators, we can assist you in managing your risk through Safety and Environmental Compliance Strategies that fit into your operations instead of apart from them.

SRM professionals are experienced with the vast array of regulatory requirements associated with OSHA's PSM Standard and EPA's RMP regulation.

Services You can Depend On

- Applicability Determination
- PSI Organization
- Procedure Development
- Process Hazard Analysis
- Off-Site Consequence Analysis
- RMP Submittal
- Emergency Response Planning
- PSM / RMP Audits

PSM/RMP Program Development

EPA's RMP Rule requires a Prevention Program that is similar to the elements of the PSM Standard. Our consultants can work with you to develop and implement your PSM / RMP Prevention Program including:

- Management System
- Employee Participation Plan
- Process Safety Information
- Process Hazard Analysis
- Operating Procedures
- Safe Work Practices
 - LOTO Program
 - Confined Space Entry
 - Access Control
 - Line Breaking
- Training Procedures
- Contractor Program
- Pre-Startup Safety Review
- Mechanical Integrity
- Hot Work Permit Program
- Management of Change
- Incident Investigation
- Emergency Response Plan
- Compliance Audit
- Trade Secrets Policy
