

## Safety & Training Services

**SRM** is unique. Our knowledgeable professionals have years of experience as safety consultants, industry managers as well as industry regulators. SRM has a proven track record with large and small businesses, in a wide variety of industry sectors.

When you choose SRM, you receive personal attention and work directly with our easily accessible Principal Consultants. SRM's goal is to streamline your safety programs so they work within your operations instead of set apart from them.

### SRM Safety Program

There is an OSHA regulation for just about everything. Our consultants can help you develop or fine tune your OSHA programs:

- Hazard Communication Plan
- Lockout/Tagout Program and Equipment Specific Procedures
- Emergency Action Plans
- Job Hazard Analyses
- Bloodborne Pathogens
- Respiratory Protection
- Machine Guarding / Mechanical Power Presses
- Facility Inspections and Audits
- Illness & Injury Prevention
- Other Site-Specific Programs

### Training Services

Understanding the intention of a regulation and the tasks needed to comply are key factors of effective safety and environmental programs. Armed with knowledge and understanding, employees at all levels make better and safer decisions.

SRM's engaging instructors offer customized and standard courses either at your facility or off-site. Courses we offer include:

- Process Safety Management
- DOT Hazardous Materials
- HAZWOPER 8-hour Refresher
- RCRA Compliance for Generators
- Respiratory Protection Program
- Fire Extinguishers
- Introduction to MIOSHA
- Hazard Communication
- Bloodborne Pathogen
- How to Prepare for a MIOSHA Inspection
- Other Site-specific Topics
- SWPPP & SPCC
- Site-Specific Topics
